(54) Title: LARGE BOTTLE-SHAPED CONTAINER HAVING SUBSTANTIALLY RECTANGULAR CROSS SECTION

(57) Abstract: A large container made of synthetic resin, and comprising a neck (1) and a body (2); said body having a substantially rectangular cross section, and including an upper body (11) and a lower body (12); said upper body (11) containing a center of gravity of the container when filled with liquid; said upper body (11) having a waist (13) section containing the center of gravity; said waist section (13) having a grip (14), said grip (14) being not adapted to absorb a negative pressure in the container; at least one surface of said lower body including a vacuum panel (16, 26). A large container made of synthetic resin, and comprising a neck (51) and a body (12); said body (12) having a substantially rectangular cross section, and including an upper body (61) and a lower body (62); said upper body (61) containing a center of gravity of the container when filled with liquid; said upper body (61) having a rib (65) containing the center of gravity; said rib (65) being not adapted to absorb a negative pressure in the container; at least one surface of said lower body including a vacuum panel (66, 67).
